**RE: 2015 Sewer Performance Annual
Report for the Town of Jamestown
WQCS 00314**

Gentlemen:

Enclosed please find the 2015 Sewer Performance Annual Report for the Town of Jamestown. The Town had one sewer spill of 25,000 gallons on October 5, 2015 (NCDEQ Incident Number 201501323). The Town was able to stop the overflow within one hour and sixteen minutes of learning of the overflow. We hope to have no sewer spills for 2016.

The Town of Jamestown collects wastewater and discharges into the City of High Point wastewater collection system where treatment occurs at the Eastside WWTF.

This letter is available on the Town's website (www.jamestown-nc.gov) and at Town Hall located at 301 East Main Street. Public notices are provided in utility billings. This report is accurate and complete to the best of my knowledge. Please feel free to contact me at 336-454-1138 should you have any questions or concerns.

Respectfully,

Paul R. Blanchard, PE
Director of Public Services
